Education

University of Illinois **Urbana-Champaign, Illinois** **Aug 2019 – May 2023**

- B.S. in Computer Engineering

Languages and Technologies

- Languages: C, C++, JavaScript, TypeScript, Python, Rust, Ruby, Java, SQL, Scala, Bash
- Frameworks and Libraries: Rails, Spring, React, Astro, Express, Redux, Expo
- Tools: Node, Vite, Postgres, Docker, GraphQL, Protobuf, Next.js, RabbitMQ, Kafka, EDI (204/214), Claude

Employment

Solutions Engineer **Chicago, IL - FarEye** **Mar 2026 – Present**

- Built event-driven integrations for enterprise clients: bidirectional TMS/WMS flows on Kafka events, EDI 204/214 with carriers, and shipment and routing webhooks
- Provided client-facing triage of production integration issues for big-and-bulky, LTL, and express clients, resolving them within 24 hours
- Developed an agentic assistant in Python with Claude and MCP that gives the team a unified view across orders, routing, events, and integration logs to trace client issues to root cause

Software Engineer **Remote - ATI Govt. Solutions** **Mar 2025 – Oct 2025**

- Architected and implemented core date calculation engine in Scala backend
- Rapidly iterated on frontend features using TypeScript and React, working closely with designers to deliver clean, maintainable code
- Proactively identified system improvements and contributed technical enhancements through code reviews and architecture discussions

Software Engineer **Remote - US Digital Corps** **Aug 2024 – Feb 2025**

- Implemented tax policy through a Scala-based DSL for IRS Direct File, targeting over 30 million users
- Collaborated with design team to develop and refactor application UI and flow in React and TypeScript
- Implemented Java APIs to validate and transform tax data into IRS e-file API-compliant formats for submission

EAS Engineer **Chicago, IL - Echo Logistics** **Feb 2024 – Aug 2024**

- Used tools such as AWS Cloudview, Splunk, and Datadog to identify past and ongoing application issues
- Debugged .NET, ASP.NET, and React Native + Angular applications based on user reports
- Developed and maintained .NET/ASP.NET applications as well as dependent SQL stored procedures

Software Engineer **Chicago, IL - Flexport** **May 2022 – Oct 2023**

- Collaborated across teams to implement accurate modeling and storage of trucking schedules in Ruby and Postgres, with GraphQL + gRPC endpoints for internal access
- Developed an in-house UI library using TypeScript for use in React Native development, with Elasticsearch capabilities
- Developed and tested cargo label generation using a Rails backend and React frontend, reducing UI interactions by an average of 40,000 per week
